

ELECTRONIC COMPONENTS

MORE THAN 1,000,000 NEW AND USED PARTS IN STOCK

With us you are always well supplied. Our warehouse contains more than 1,000,000 components for automation technology. Our parts are available for you around the clock, even on holidays and weekends. Convince yourself and visit our webshop with online support and 24h ordering service under www.softwerk.at.

➤ Siemens and many other manufacturers

We are specialized in Siemens products; however, you will also find components from many other well-known manufacturers such as Lenze, ABB, Schneider, AEG, Danfoss, Omron, Allen-Bradley, etc.

➤ already discontinued and new components

Our stock consists to a large extent of already discontinued parts and components, which are no longer available from the manufacturer. Of course, you can also get the latest models from us. If a discontinued component is not available in the webshop - please just ask - our employees will try to get it through our wide partner network.

➤ Testing of used components

Used components represent a popular and favorable alternative to the new product. To ensure high quality of used items, critical components are inspected and tested by our testing department before sale.

➤ fast delivery, payment on account

70% of our sold parts are shipped the same day and are thus ready for use at the customer's in a short time. For urgent cases we are happy to organize express deliveries and delivery by courier service. In order to make it as easy for the customer as possible, there is the possibility of payment on account for customers from Germany and Austria.
